

50 YEARS OF EXPERIENCE

# Company Profile

*Res Pharma was founded in 1962 as a trading company for pharmaceutical products. It was acquired by the current ownership in 1979. In 1983 the Cosmetic Division was opened and has since become the company's core business. Today Res Pharma is a modern and dynamic company focused on the production of a complete range of ingredients for the cosmetic industry. Our quality management system is constantly updated according to the requirements of UNI EN ISO 9001:2008 certification. Res Pharma is active worldwide thanks to a network of dynamic and professional distributors and agents. In recent years Res Pharma S.r.l. has consolidated its reputation as a manufacturer of innovative natural orientated cosmetic ingredients. At Res Pharma product innovation is spawned from a philosophy that takes the new needs of consumers into consideration: safety for consumers and for the environment, immediate and long lasting efficacy, personal well being and the concept of natural. The determination to satisfy such requirements is what drives Res Pharma's advanced research laboratories to study new natural active ingredients based on the re-discovery of botanical traditions that have been scientifically validated through chemical analysis and safety and efficacy tests. Under its "Sustainability" policy Res Pharma is already involved in several areas of innovation: several Res Pharma products are certified under the Ecocert label and have been for several years. We*

*have recently obtained the Fairtrade permission to trade certificate as we move into this interesting and fast developing area. We have already launched 3 new Fairtrade derived products for the cosmetic industry and the range will continue to grow.*

*Res Pharma is also actively participating in several government (local and European) financed projects for the development of new "green" cosmetic ingredients.*

**Citrique Belge**[www.citriquebelge.com](http://www.citriquebelge.com)

Res Pharma continua a distribuire gli acidi citrici della Citrique Belge, dopo la sua recente separazione dal gruppo DSM.

Res Pharma è **DISTRIBUTORE AUTORIZZATO** per l'Italia per i settori personal care e nutraceutico di DSM Nutritional Products, divisione del gruppo olandese DSM, nata nel 2003 grazie all'acquisizione della divisione Vitamine e Fine Chemicals della Roche e oggi leader mondiale per la fornitura di vitamine, carotenoidi, omega 3 e omega 6, acidi citrici, ingredienti attivi per la nutraceutica, principi attivi e ingredienti per la cosmetica e filtri solari. DSM Nutritional Products è attenta all'innovazione, con la messa a punto di nuovi prodotti e nuove applicazioni per tutti i segmenti dell'industria. Ha moderni centri di ricerca e impianti di produzione per la fornitura di prodotti e servizi innovativi per il benessere della persona. Dispone di 11 siti di produzione in sette Paesi, oltre a 13 impianti per la produzione di premix, e di 8 centri di ricerca in Svizzera. Tutti i processi sono pensati per anticipare le esigenze dei clienti e i trend di mercato. DSM Nutritional Products è sinonimo di qualità e affidabilità dei prodotti e di collaborazione nelle relazioni con i clienti per la costruzione di una solida partnership e lo sviluppo di soluzioni all'avanguardia.

Res Pharma è **DISTRIBUTORE ESCLUSIVO** per l'Italia di GREENTECH, azienda francese nata nel 1992, leader nella produzione di estratti vegetali e nella ricerca e sviluppo di principi attivi di origine vegetale per l'industria cosmetica e nutraceutica. Il gruppo è composto da 7 aziende specializzate nella produzione, ricerca e sviluppo e commercializzazione di estratti e attivi vegetali, estratti da alghe e microalghe marine, dolcificanti naturali, acidi grassi essenziali. Gli stabilimenti produttivi coprono un'area di 3200 mq, con laboratori di oltre 500 mq, e sono dotati delle più sofisticate attrezzature di produzione e ricerca, per soddisfare la richiesta di prodotti e servizi di elevata qualità. Grazie ai centri di ricerca con personale altamente qualificato e ad un'attiva cooperazione con università e istituti di ricerca, Greentech vanta un'attività scientifica di pregio che le consente di perfezionare costantemente la conoscenza del mondo vegetale e di essere all'avanguardia nella messa a punto di prodotti e applicazioni innovativi. In linea con le moderne tendenze del mercato, Greentech è in grado di fornire estratti vegetali certificati biologici ed è già da anni sensibile al tema dello sviluppo sostenibile.

[www.greentech.fr](http://www.greentech.fr)

A seguito della recente acquisizione da parte di Greentech dell'azienda Phytocos, Res Pharma ora rappresenta anche questa prestigiosa realtà francese, nata nel 1985, specializzata nella produzione di prodotti naturali, (burri, Soft Butters®, olii vegetali, esteri e acidi grassi).

QUALITY CONTROL  
TECHNICAL ASSISTANCE

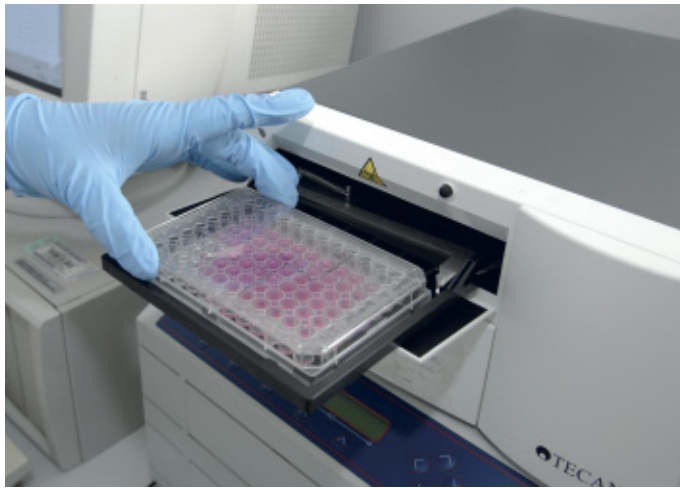

*For many years now, Res Pharma Centro Tecnico has been working with the objective of giving quality technical support for its customers development and project needs. It is a working group of technical staff that include the R&D department, the Quality Control and Technical Assistance group and several top class formulation experts. This highly qualified group offers high quality technical pre-and post-sales assistance and is dedicated to assisting customers and potential customers with every technical need regarding Res Pharma products, from simple technical questions to complete formulation techniques.*

*The R&D department works with creativity, spirit of innovation and is oriented towards constant improvement in order to anticipate customer needs with innovative solutions that meet with modern market trends and regulatory requirements.*

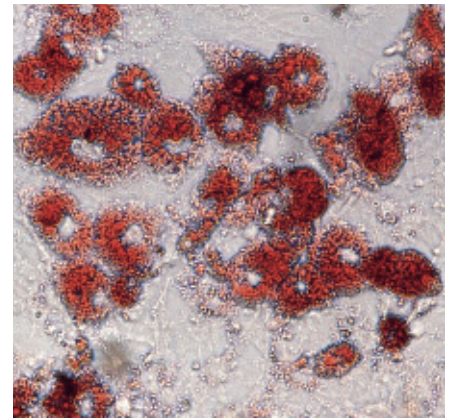

*The development and selection of our product range is performed with respect to the markets need for natural products, from renewable sources, considering the concept of sustainability and ecological impact. They are easy to use, have high and proved safety profiles in accordance with the current legislation, and are designed for classical and innovative applications.*

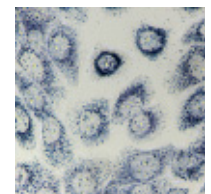

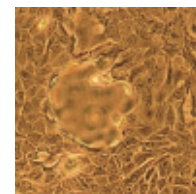

*The new laboratory has been conceived to evaluate the bio compatibility and effectiveness of ingredients and finished products through the application of biological In Vitro methods that require the use of different types, by complexity and origin, of cell cultures. The laboratory is equipped with the technology necessary for the medium term conservation of cell lines of human and animal origin, their manipulation in safe and sterile conditions, and the study of specific markers of cell suffering and functionality.*

*In recent years the requirements of manufacturers have moved on from the simple need to demonstrate a product is harmless to a need to prove it's functional claims. On the wave of this requirement, with the intention of supplying objective evidence regarding the declared functionality of a raw material or finished product, it is possible to perform specific efficacy studies. Protocols for quality - quantity studies of efficacy referring to antioxidant metabolism, inflammatory/anti-inflammatory, pigmenting/de-pigmenting, cell growth stimulation (cell renewal) are currently being used. It is also possible to perform morphologic analysis of cell substrates to evaluate cell vitality and wellbeing.*

*The objectives of the new laboratory, therefore, are yes to evaluate the biocompatibility of various products, but also to offer technical scientific support for the completion of studies designed to demonstrate the efficacy of ingredients and finished products.*

*Res Pharma's headquarters are based in Trezzo sull'Adda. The company now includes 2 realities: Res Pharma Industriale which takes care of all industrial matters including the production itself and the R&D and QC facilities, Res Pharma S.r.l. continues to take care of the commercial and logistic side of the business including the management of Res Pharma's world-wide activity.*

*The offices, R&D, QC and Cell Biology laboratories, production and warehouse cover 3200 m<sup>2</sup> of a total area of 7000 m<sup>2</sup>. The production department and laboratories have been recently expanded and reorganized in the name of continuous innovation and concern for environment, health and safety.*

*Today Res Pharma is equipped with modern manufacturing facilities where it is possible to perform sophisticated production runs. Our production facilities comply with the most severe safety legislation, despite being designed to offer our customers maximum flexibility.*

*Custom solutions are the ultimate embodiment of RES PHARMA's dedication to customer satisfaction: the seamless and optimal integration of RES PHARMA technology into the customer's application. Customers benefit from the full breadth of RES PHARMA's know-how.*

*Res Pharma has also obtained a written attestation that we have adopted the requirements of the GMP Guide for Cosmetic Ingredients of the EFfCI (European Federation for Cosmetic Ingredients) with regards to our production activities, technical assistance and sales of raw materials and formulated products for the cosmetic industry.*

*Res Pharma is also actively participating in government (local and European) financed projects for the development of new “green” cosmetic ingredients. “Green Cosmetic” is an ambitious two year project financed by the Regione Lombardia (the Italian Lombardo area regional government) that involves a research chain including three small to medium size companies, a large company and a public research entity. Res Pharma has the privilege of heading up this prestigious group. The theme of Res Pharma Industriale’s research is “The development of new polymeric materials with emulsifying and cosmetic properties” and it foresees the development of polyglyceryl transesterification processes starting from vegetal oils with a particular respect for the raw materials being used.*

**The final objective is to obtain green, safe, innovative ingredients of natural origin that are:**

- PEG-Free
- With cosmetic properties
- With a high technological profile
- Dermal-compatible

**Which can be used in the formulation of:**

- Fluid and creamy emulsions (for face-body treatment)
- Personal hygiene products
- Emulsions for wet wipes (sun care and baby products)
- Green, ecological and organic cosmetic lines
- Cold processing products (Energy saving)
