Ultra-concentrated boosters, the quintessence of Nature
A PIONEERING GROUP, BIOTECHNOLOGY EXPERT IN ALL NATURAL ENVIRONMENTS

A pioneer in botanical biotechnology at its creation in 1992, GREENTECH develops high technology extracts and active ingredients derived from the internal mechanisms of plants, algae, micro-algae and microorganisms from around the world for cosmetics, pharmaceutics and nutraceutics.

One company is dedicated to each biological universe:

- **BOTANICAL**: Active ingredients and extracts derived from plants and biotechnologies for nutraceutics, pharmaceutics and cosmetics.
- **MARINE**: Active ingredients and extracts derived from micro-algae, algae and halophyte plants for nutraceutics, dietetics, cosmetics, immunodiagnostics and aquaculture.
- **MICROBIAL**: Microbial biotechnology for nutritional, agronomic, pharmaceutical, dermocosmetic and environmental purposes.
- **BRAZILIAN BIODIVERSITY**: Active ingredients derived from Brazilian biodiversity for the cosmetics, pharmaceutics and nutraceutics markets.

▷ AN UNLIMITED RESOURCE

GREENTECH gathers its resources from every continent in order to exploit the natural adaptive systems of regional species. GREENTECH has uncovered over 300,000 bioactive molecules across the world’s latitudes and longitudes, developed a hundred active ingredients and over 3,000 extracts.

▷ CUTTING EDGE RESEARCH

Researchers (one third of our staff) have for over 20 years shared their scientific knowledge across all disciplines (plant biology, botanical science, phytochemistry, microbiology, biochemistry, chemistry, algology, nutrition, cosmetics, etc.).

The laboratory possesses its own data bank of over 30,000 botanicals and 300,000 biological molecules.

High-tech processes used by the pharmaceutics industry transform natural ingredients into actives: ethnobotany, bio-informatics with molecular modelling, transcriptomic analysis (complete genome), fermentation, a patented cryoextraction system that preserves the plants’ active essence...

Mastery of high technologies witnessed by numerous quality accreditations and awards.

Every year, over 15% of turnover is reinvested in R&D.

▷ A CUSTOMISED SERVICE, WITH EXCLUSIVE OR PERSONALISED ACTIVE INGREDIENTS

GREENTECH develops specific, customised actives for the most demanding brands in the market either exclusively or using existing active ingredients that are adapted to their demands. Reactivity and Flexibility are the master words in the company. The GREENTECH’s factory produces in volumes of between 50 kg to 200 t.
A GROUP DEDICATED TO BEAUTY, HEALTH AND WELL-BEING

COSMETICS

> Powerful natural active ingredients, effective concentrates, and genuine biological boosters that target the very heart of the physiological mechanism. They have a visible effect on skin, and their impact on beauty and well-being is substantiated and proven by biochemical, cell culture (in vitro), and in vivo tests...

> Titrated and certified extracts, sourced from around the world, with guaranteed, stable and high biological grade quality.

> Texturing agents and scrubs that unite effectiveness and sensory.

NUTRACEUTICALS

Development and production of botanical extracts for nutraceutical applications, dietetic supplementation and functional foods: micro-organisms, titrated botanical extracts, ingredients extracted from microalgae, sweeteners.

PHARMACEUTICALS

Extraction, purification and manufacture of numerous active ingredients and molecules for pharmaceutical laboratories. Compliant with GMP.

A GROUP THAT IS THRIVING

> PRODUCTION SITE AND INTERNATIONAL PRESENCE IN CONSTANT DEVELOPMENT

More than 10,000 m², including 2,000 m² of laboratories equipped with the most sophisticated active ingredients’ extraction, analysis, stabilisation technologies and equipments. 4,500 m² are dedicated to production...

With its 4 companies, GREENTECH, GREENSEA, BIOVITIS and MAPRIC, and 3 subsidiaries in Germany, USA and Brazil, the Group operates on all continents and in over 30 countries worldwide thanks to a network of local distributors.
A HIGHLY COMMITTED GROUP

› INNOVATION IN MOVEMENT

Since its inception, GREENTECH has closely collaborated with universities and research centers throughout the world, and it holds many patents. GREENTECH works in partnership with recognised experts across many scientific fields, and organises since 2008 the bi-annual SPIM (Skin Physiology International Meeting - www.skin-meeting.com), an international congress on the latest scientific research in cutaneous physiology.

› EXCELLENCE, A CERTIFIED QUALITY

The extraction processes developed by GREENTECH guarantee the very best from plants. For example, cryogenic handling of fresh plants, cryo-extraction is able to ensure production throughout the year while maintaining the organoleptic properties and quality of the active molecules found in fresh plants.

Quality Control begins from the moment the plant arrives until the active ingredient or extract is delivered, with the guaranty of total stability of the actives. Pharmaceutical rigour is applied to the in vitro, in vivo and biochemical efficiency tests carried out on all our active ingredients.

Organic certifications: some productions are carried out in line with Ecocert and Natrue standards. They are extracted under the organic referential (for example COSMOS or ECOECERT) for solvents and processes.

› BUILT ON SUSTAINABLE DEVELOPMENT AND FAIR TRADE

Confident that ethics is a source of progress, GREENTECH was also a pioneer in being the first to adopt sustainable practices and fair trade. It has forged long term partnerships based on equal and mutual benefits from Auvergne to Peru or Burkina Faso. Fully committed to the preservation of rare or threatened species, GREENTECH collaborates with local communities in over 20 countries around the world from the North and South Poles to the Equator, including:

MADAGASCAR

Since 2008, GREENTECH has benefited from a relationship with the university of Diego Suarez d’Antsiranana within GreenMadag, a joint structure dedicated to the development of new active ingredients derived from local flora. A research and education programme: supply of equipment, student training, carrying out extractions in situ.

PERU

In 2003, GREENTECH supported the Agroindustrias Amazonicas company during the extraction of Inca Inchi® oil, the richest source of omega-3, with a technological and commercial partnership. Over 5,000 hectares were planted, providing a livelihood to 10,000 families.

BURKINA FASO

Since 1999, GREENTECH has supported a group of women in the production of baobab oil (material donation and training), guaranteeing order quantities and prices.

GREENTECH is compliant with:

• ECOCERT Greenlife certification scheme,
• ISO 22 716 standard,
• GMP standard,
• Requirements of NATRUE regulation.

COSMETICS

POTENT AND HIGHLY EFFECTIVE NATURAL ACTIVE SUBSTANCES

▷ PHYTOBIOACTIVE SUBSTANCES

Ultra-high concentration boosters, the essence of Nature
Maximum concentrated and purified, greater than that of the plant itself, obtained by successive purification steps, liquid-liquid extraction, precipitation, chromatography, or by high-tech procedures [enzyme bio-purification or bio-conversion, super-critical CO₂ extraction].
A unique biological effectiveness, giving visible results on skin, proven by in vivo and in vitro tests.

• Plant phytobioactives of terrestrial or marine origin.
The most effective adaptive systems are converted and applied to the skin’s deep-seated mechanisms through the use of molecular modelling, bioinformatics and whole genome transcriptome studies [as in the pharmaceutical industry].

• Phytobioactives of biotechnological origin
Phytobioactives are obtained by fermentation from pure strains of micro-organisms, biosynthesized and purified by cutting edge techniques. Ferment’Actives are obtained by an original plant fermentation process involving a selected micro-organism, increasing the active molecule concentration and hence potentiating the product efficacy.

▷ COSMÉLÈNES®

Water-soluble active substances, at a concentration similar to that of the plant
These plant ingredients, with active molecule concentrations similar to those of fresh plants, are selected for their well-known efficacy in traditional pharmacopoeias [demonstrated via in vivo/vitro tests].

▷ LIPOBIOACTIVES

Lipid-soluble active substances for fully active formulations
Derived from plants acknowledged in the literature for their cosmetic efficacy, these lipid compounds are integrated into oil phases, or represent the main components of oil formulations. Thus they increase the active principle concentration and hence the overall activity of the formulation. The aim of introduction of Lipoactives in final formulation is to supply a synergistic effect effect between the aqueous and oil phases (in vivo/vitro tests).
WHOLE NATURAL EXTRACTS WITH STRONG BIOLOGICAL ACTIVITY

CRYOEXTRACTS PATENT

The strength of plants restored through its purity
Cryo-extraction of fresh plants, a GREENTECH-patented technology, enables the solvent-free sampling of the plant natural sap in its highest purity and integrity, and to recover its active ingredients with optimal efficacy: their biological activity is 5 to 10 times greater than that of dried plant extracts.

Two high-tech product ranges thus restore the most fragile components of the plant:

- Cryo-buds
  The plant buds encapsulate all of its power, concentrating both nutrients and regenerative substances. Native sap in liquid form.

- Medulats
  These are obtained from freshly harvested plants, using a specific process that preserves the native quality of the plant. Native sap in liquid form.

COMPLEXES

A combination of plants acting in synergy
Mix of active plant extracts from plants, algae and/or micro-algae with known activity (the well-known PHYTELENES®) reinforcing individual efficacy by their synergistic activity, for an effect on the skin’s various physiological targets.

TEXTURIZING AND EXFOLIATING AGENTS

TEXTURIZING AGENTS

• AQUASILIOILS®
  Oils known for their properties in cosmetics, processed to render them water-soluble in many dosage forms. They combine activity and sensoriality, as well as our range of GREENSOFTS® and VEGETABLE BUTTERS.

EXFOLIATORS

Derived from plants, fruits or minerals, their variable intensity suits all types of skin and all needs, from a gentle to a very vigorous scrub: any particle size - 15 to 2,000 microns - any texture, any colour, for the face or body.

CLASSIFICATION OF ACTIVES

- Biotechnology
- Botanicals / Hydrosoluble ingredients
- Botanicals / Liposoluble ingredients
- Marine
### ACTIONS

<table>

### Anti-oxidant

| **ACEROMINE**<br>NATURAL VITAMIN C CONCENTRATE | • Anti free radicals<br>• Prevents premature aging (UV, pollution...)<br>• Reduces skin pigmentation<br>• Stimulates collagen synthesis | Water, Malpighia Punicifolia (Acerola) Fruit Extract, Alcohol, Glycerin, Lecithin, Guar Hydroxypropyltrimonium Chloride, Benzophenone-4 |
| **ARCTIC BERRIES**<br>DETOXIFYING | • Regenerates and hydrates<br>• Anti-oxidant and detoxifying<br>• Venous tonic (anti redness and anti heavy legs) | Water, Glycerin, Vaccinium Vitis Idaea Fruit Extract, Rubus Articus Fruit Extract, Rubus Chamaemorus Fruit Extract |
| **BUTCHER’S BROOM MEDULATE**<br>ACTIVATES MICRO-CIRCULATION | • Anti-inflammatory and soothing<br>• Activates micro circulation, reduces redness | Water, Propylene Glycol, Ruscus Aculeatus Root Extract |
| **POMEGRANATE FERMENT’ACTIVE**<br>ANTI-AGING | • Traps free radicals and prevents oxidative stress<br>• Fights premature aging | Punica Granatum Fruit Extract |
| **TEALINE®**<br>ANTI-OXIDANT SHIELD | • Regulates photo-aging<br>• Fights the causes of oxidative stress<br>• Reduces environmental skin damage (UV, pollution, smoke...) | Camellia Sinensis Leaf Extract, Aspalathus Linearis Leaf Extract, Maltodextrin |

### Anti-pollution

| **URBALYS®**<br>GLOBAL ANTI-POLLUTION | • Protects against pollution attacks<br>• Fights free radicals<br>• Activates endogenous skin defenses and cellular detoxification systems<br>• Combats inflammation<br>• Strengthens the cutaneous barrier and maintains dermis integrity | Water, Propanediol, Schisandra Chinensis Fruit Extract |
### Anti-wrinkle

#### Anti-Wrinkle Complex
- Inhibits the formation of free radicals
- Protects collagen and elastin fibers
- Tones and stimulates the epidermis

#### Centella Asiatica® Collagen
- Softens the complexion
- Reduces medium and deep wrinkles

#### Liftiss®
- Softens fine lines and wrinkles
- Instant lifting effect
- Hydrates the epidermis

#### Setiline® Sn
- Slows the aging process
- Reduces fine lines and wrinkles
- Improves elasticity and firmness
- Increases epidermal thickness and strengthens the cutaneous barrier

### Energizing

#### Somitine® Boosts Radiance
- Increases cellular energy and activity
- Restores skin glow and radiance

### Regenerating

#### Terminalia Cosmeleine® Supports Skin Care
- Reduces tired-looking skin
- Improves skin tone
- Stimulates collagen synthesis

### Restructuring

#### Ginseng Cosmeleine® Reconstructing Collagen Stimulator
- Stimulates collagen synthesis
- Improves skin tone
- Improves cutaneous nutrition

#### Qt40® Facial Remodelling
- Replenishes the skin
- Improves elasticity and firmness
- Resculpts the facial contour

#### Tamanol Lipactive Regenerating
- Stimulates fibroblast activity
- Reduces wrinkles
- Improves the appearance of scars
- Reduces the appearance of stretch marks

### Balance

#### Acnily® Oily Skin Regulator
- Prevents hyperseborrhea
- Limits microbial proliferation
- Reduces inflammation
- Improves hydration and radiance

#### Apricot Lipactive Hair and Skin Protection
- Nourishes and regenerates the skin
- Smoothens and softens, restores radiance
- Smoothen and strengthens hair cuticles
- Protects hair fibers and leaves hair silky smooth

#### Greensil Natifying
- Absorbs sebum and matifies
- Absorbs sweat and reduces odor
- Adds a soft and silky feel

#### Organic Inca Inchi® W Lipactive Skin and Hair Nutritional Repair
- Regenerates the skin
- Maintains skin lipid balance
- Softens skin
- Smoothen and strengthens hair cuticles
- Leaves hair soft and silky smooth; adds volume

#### Seborilys® Integral SeboRegulator
- Reduces oil secretion
- Reduces acne and greasy scalp
- Reduces skin irritation

### Complexion

#### Clerilys® W Anti Blemish Depigmentation
- Reduces skin pigmentation
- Reduces age spots and pregnancy mask
- Balances and brightens the complexion

### Care

#### Liffers®
- Reduces skin pigmentation
- Balances and brightens the complexion
